EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Peter Martine on 09/16/04.

The application has been amended as follows:

- Cancelled claims 1 and 3

The following is an examiner's statement of reasons for allowance:

- The primary reason for allowance for claims 2 and 4 is the inclusion of the limitation of a printing method and a printing device comprising the steps of preparing a plurality of color conversion lookup tables for converting first color image data expressed by a first color system to second color image data expressed by a second color system for an ink set, the plurality of color conversion lookup tables including a first color conversion lookup table with comparatively desirable characteristics of dependence of color appearance on a light source and a second conversion lookup table with comparatively desirable characteristics of graininess and selecting one color conversion lookup table from the plurality of color conversion lookup tables and converting the first color image data to the second color image data. It is

these limitations, either alone or combined, that have not been found, taught, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Jacob et al. (6,690,489) teaches color converters using color conversion algorithms that are potentially specified by graphics commands during rendering. A lookup component is associated with the color converters, wherein the lookup component indicates output color values.
- Fujimori (6,783,203) teaches a printer driver including a resolution conversion module, a color conversion module, a halftone module, a rasterizer, and a color conversion lookup table LUT.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lamson D Nguyen whose telephone number is 571-272-2259. The examiner can normally be reached on 8-5.
